

\$TENCENT

Introduction

The digital world is becoming a sure thing in everyone's life year after year, everyone knows this, big financial institutions are making their way in the crypto space dragging everyone's attention. There are thousands of choices, but there are only a few winners. You would not want to put all your life savings in a token that has nothing behind it, you would risk waking up next day and Realise that all your money were gone.

However, there are many attractive tokens that have great teams behind them and are making sure there is growth and continuity for their projects. You would really want to invest in this kind of projects that can guarantee each investor there are benefits attached to their investments, and even more you would make sure to invest early so will enjoy more benefits along the way. The benefits are closely linked to the utility of such tokens.

What if apart from the token price continuous appreciation you would receive passive income?

This is where TENCENT comes in. It is frictionless yield and liquidity generation smart contract protocol that works by applying 10% fee for each transaction and instantly splitting that fee by rewarding holders with 4% and auto locking 3% in Pancake LP, 2% TENCENT lover fee, 1% Burn fee. Holders can enjoy earning rewards by just holding TENCENT tokens in their wallets. Contract allows to exclude certain addresses like PancakeSwap from receiving rewards, as well allow to include certain address to receive reward if required.

Why would I buy and hold TENCENT ?

Buying TENCENT will ensure you of having invested your money in a project that is going to multiply your investment over time. By just holding you are making more money than any bank can offer as interest or compound interest return. Not only compared to banks, but the passive reward system that TENCENT holders benefit from is even better than burns and buy-backs systems, there are burns taking place in TENCENT as well. The team is working tirelessly on producing best projects that have the potential of lifting this to new heights. There is a vision and a devoted team that is using their amazing skills in a creative way to achieve success. If these are not enough, keep in mind that there is more to come, as we have plans to create our own merchandise, develop partnerships, integrate NFT's, and much more.

What is TENCENT ?

A revolutionary platform to leverage risk for dynamic yield generating strategies, in combination with frictionless holder incentives and reward structures. We created TENCENT to provide our holders with leading tokenomics within the DeFi space. Our frictionless yield & liquidity generation protocol means that you earn passive income without having to do anything at all. At TENCENT, we charge a 10% transaction fee which is split in two ways 3% goes into a locked liquidity pool and 2% dog lover fee, 1 % burn fee is shared amongst our stakeholders. This is called a deflationary currency and will earn up to 80% annual yield percentage - exceptionally higher than any traditional savings account.

TENCENT Protocol

Most tokens suffer from the inevitable valuation bubble, which is then followed by a quick decline in price. This is very common in the crypto space, especially with altcoins that are just starting out. There have been various solutions to solve this problem in the past with each working to a certain extent but none are foolproof. To address this problem as effective as possible, TENCENT uses a combination of three major solutions that have been proven to work: reflection, automatic liquidity addition and token burn. Each will be explained in more detail in the following chapters.

Reflection

The reflect function taxes 10% of every TENCENT token transaction, instantly splits that fee and awards it to all holders of the token. Token holders don't need to stake or wait for fees to be delivered. All fees are reflected immediately and in real-time directly to the holders wallets. There is no need for centralized interfaces and there are no vaults that could be hacked or drained. This provides additional security and confidence as all holders have to do is keep their tokens in their wallets and watch their balance grow without the need to do anything.

Automatic LP Liquidity Addition

TENCENT uses Auto LP as a function that acts as a two-fold beneficial implementation for holders. First, the contract sucks up tokens from sellers and buyers alike, and adds them to the LP creating a solid price floor. Second, the penalty acts as an arbitrage resistant mechanism that secures the volume of TENCENT as a reward for the holders. In theory, the added LP creates a stability from the supplied LP by adding the tax to the overall liquidity of the token, thus increasing the tokens overall LP and supporting the price floor of the token. This is different from the burn function of other reflection tokens which is only beneficial in the short term from the granted reduction of supply. As the TENCENT token LP increases, the price stability mirrors this function with the benefit of a solid price floor and cushion for holders. The goal here is to prevent the larger dips when whales decide to sell their tokens later in the game, which keeps as it does with most low liquidity tokens. TENCENT Auto LP fee is set at 10% for every sell order executed.

Launch

At TENCENT we believe in complete decentralization and transparency.

Trust & Security

Trust and Smart Contract safety are of utmost importance to the TENCENT project. Immediately after launching our smart contracts we commissioned a reputable 3rd party company Tech RATE to perform a full audit of our smart contract. No major vulnerabilities were discovered during the audit (report available at: [Tech Rate report](#)) In addition to the audit our code is freely available on GitHub and we encourage everyone to perform more audits if they deem it necessary. As for liquidity, all of the initial PancakeSwap tokens were locked via Unicrypt immediately launched and locked. This number will keep rapidly increasing as more volume hits the exchange pairs. There are also no malicious contract functions that would enable the team or anyone else to mint more tokens or pull the liquidity so TENCENT is officially rug proof.

TOKENOMICS

Community, Marketing & Partnerships

Community is at the core of the TENCENT project. Even the best technology out there is useless unless it has a good amount of people using it. To ensure the best project exposure an expansion on all social media platforms is necessary. The goal is to build a strong presence on Telegram, Discord, Twitter, Reddit, Youtube, Instagram and Tiktok. We are always on the lookout for new niche marketing opportunities and the goal is to capitalize on them as soon as they appear. Ofcourse community suggestions are always welcome and will be rewarded. The idea is to also build a community marketing fund or some sort of treasury where the gathered funds are used for funding best community marketing incentives. TENCENT has plans to partner up with other well known projects in the DeFi space for shared marketing purposes and product development. Incentives in this direction have already been established and the results will be presented in forms of official announcements.

Future Vision.

TENCENT Protocol was developed as an underlying asset platform for a wide variety of real use cases. With the finely tuned tokenomics and .it can for example be used as a reserve token for Decentralized Crowdfunding Platforms, Tokenized Charity Organizations or DeFi Stock Derivative Platforms. These are the most prominent use cases proposed at the time of writing this whitepaper, ofcourse a lot of very interesting use cases have been proposed by the community. The impressive thing about TENCENT is that it's not limited to just one direction so a lot of use cases can be built on the Protocol. More use cases are being discussed and developed and will be disclosed in future versions of this whitepaper.

Legal

The following White Paper consists of information given for discussion purposes only and does not represent investment advice of any kind. Further, it does not constitute an offer to sell shares or securities nor does it constitute a solicitation to buy such shares or securities. None of the information found within is intended to influence any investment decision nor should it be the basis of an investment decision of any kind.

Investment advice for investment in any security, or any tax or legal advice should only be given by an investment advice firm, and TENCENT is not an investment advice firm. TENCENT encourages readers to seek appropriate and independent professional advice to inform themselves of the legal requirements and tax consequences of any investments they make, both within TENCENT and within the Blockchain industry as a whole. Investments should only be done with the help of an independent financial advisor within context of the countries of their citizenship or residence, and their place of business with respect to the acquisition, holding or trade in TENCENT or any other tokens. Please note that this White Paper does not constitute an offer to sell, or the solicitation of an offer to buy, for any person for whom it may be unlawful to participate in a token sale. Those for whom it is unlawful to participate should not participate. Consult with your own lawyer or accountant to determine whether it is lawful for you to participate in this token sale. This White Paper should in no way be construed as being intended to create a contract for investment. This White Paper (edition 1.0) may be revised, with the newest edition always appearing on our website. For each revision cycle, we will provide notes on what has changed the justification for the change. Updated versions of the White Paper (as indicated by consecutive edition numbers) may contain information which may override, clarify or contradict previous editions, in which case the latest version should be considered the most accurate and up to date. Because of this, versions which are found outside of the official TENCENT website may contain out-of-date or inaccurate information. The most up-to-date version of the white paper can be located online at [HTTPS://TENCENTTOKEN.VIP](https://TENCENTTOKEN.VIP)

ROADMAP

Q #1 : Research & Development

Q #2 : Contract Development - Smart Contract Deployed - Website Launch - Logo Update - Blockchain Develop - TENCENT Lover Program

Q #3 : Liquidity Adding on PCS - Media Partnership Announcement - Gamification Project – Blockchain Landing - Most Fair Launch on PCS - Soon Listing → CMC, CG, LCW.

Q #4 : Innovation Project Program - Major Partnership - NFT Marketplace - TENCENT's Charity Project - Marketing Sustainable - TENCENT Against COVID (Feature Project)

PROJECT ADVANTAGE

FEATURES

Earn \$BNB by \$TENCENT

4% of every transaction is taken and redistributed to all \$TENCENT holders in **\$BNB**. Accumulate \$BNB by hodling the \$TENCENT Token !

AUTOMATIC LIQUIDITY POOL

4% of every transaction contributes toward automatically generating further liquidity on PancakeSwap. Benefiting long term for \$TENCENT holders the most !

RFI STATIC REWARD

2% of every transaction is taken and redistributed to all \$TENCENT holders. The burn address is also a holder thus each transaction helps deflate the supply.

Highly Secured

All Initial Liquidity Provided will be locked with Uniswap. The contract is Trustless for \$TENCENT community. We will release the audit reports shortly as they are under progress.

Built For The Community

\$TENCENT is a community driven token built on Binance Chain. It will be available on Uniswap for Presale with No Transaction Fee for early investors. PCS Launch price will see atleast 10% uplift and introduction of transaction fee's.

Inbuilt Anti Whale Mechanism

Transaction (Sell/Buy) that trade more than 0.1% of the total supply will be rejected. Whales who make transfer (between 2 wallets) that is larger than 0.1% of the total supply will be charged 1BNB which will further be donated to Charities.

Our Community

We are encouraging new talented people to join our community, as this is the biggest driving force behind the success of TENCENT. Being in the crypto space offers so much excitement and there is so much potential in here. Our numbers are growing hour after hour as more people are finding out about TENCENT success. Everyone is important in our community, and if you have any questions our team is always happy to help. You can reach us on different platforms at <https://tencenttoken.vip>, including :
